About Us

The West East Institute is a global scientific and academic learned society founded in 2012 for the purpose of disseminating the latest academic research on various business, economics, and social sciences-related topics. The scope of our mission has expanded to include many areas of academic knowledge, including geography, education, culture, and more.

Having established *the Journal of WEI Business and Economics* and *the West East Journal of Social Sciences* over 6 years ago, The West East Institute is becoming known for publishing quality research for the benefit of the global academic community. We also sponsor several international conferences annually

attended by a diverse array of academics and professionals from many nations, cultures, and religions around the world. These conferences are intended to promote excellence in academic research and provide a platform for academics and researchers to share their completed and ongoing research and network with colleagues. It is also a welcoming environment for graduate students to present their work and receive valuable feedback.

Each conference has two broad tracks: Business, Economics, Finance, & Management; and Education, Humanities, & Social Sciences. At our conferences, not only may many nations of the world be seen in each session meeting room, but a diverse array of topics of enquiry may be encountered. Our publications and conferences represent the community of nations. Diversity of culture, ethnicity, and religion is paired with a common, unifying purpose of excellence in science and philosophical enquiry. We look forward to seeing you soon at one of our several conferences held around the world each year!

Dr. Rutherford Johnson, PhD, FPRS, FRGS
University of Minnesota
General Conference Chair
West East Institute

- Engineering
- Finance

- Human Resources
- Information Systems
- International Business
- Public Relations for Business
- International Energy Development & Usage
- Management
- Management Theory
- Strategic Management
- Marketing
- Organizational Behavior
- Service Science
- Supply Chain Management
- Taxes

Topics for Education and Teaching Conference

Topics include, but are not limited to:

- Accreditation
- Blended Education
- Business Education
- Contemporary Issues in Education
- Curriculum
- Distance Education
- E-Learning
- Early Education
- Engineering Education
- ESL
- Health Education
- Higher Education
- Information Science
- International Education
- K-12 Education
- Language
- Language Education
- Music Education
- Professional Development
- Educational Policies
- Science Education
- Secondary Education
- Special Education
- Teaching and Learning
- Teacher Education
- Teaching Method

Topics for Humanities and Social Sciences Conference

Topics include, but are not limited to:

- Accreditation
- Anthropology
- Arts & Humanities
- Blended Education
- Business Education

- Contemporary Issues in Education
- Culture
- Curriculum
- Distance Education
- E-Learning
- Early Education
- Engineering Education
- ESL
- Globalization
